Tab 1

Perfect — now we're doing this the **right way (PM-first, design-led, scalable)**.

You don't need code yet.
You need a **crystal-clear Information Architecture (IA)** that will guide:

👉 Antigravity
👉 UI design
👉 Engineering structure
👉 Storytelling flow

🧠 INFORMATION ARCHITECTURE DOCUMENT

Antigravity Portfolio (AI-Native Product Manager)

🎯 1. PRODUCT GOAL

Primary Goal:
Communicate within 5–8 seconds that:

> "This is a high-signal, AI-native Product Manager who ships, not just strategizes."

Secondary Goals:

- Showcase proof of work (case studies + prototypes)
- Build credibility through metrics
- Differentiate via AI systems thinking
- Drive inbound (recruiters / founders)

👤 2. TARGET USER

Primary:

- Startup founders
- Hiring managers (Consumer / AI products)

Secondary:

- Product leaders
- Other PMs / builders

🧭 3. CORE USER JOURNEY

Landing → Hook (Hero)
→ Scan credibility (Metrics)
→ Explore Work (Projects)
→ Validate depth (AI Systems + Thinking)
→ Build trust (Failure section)
→ Take action (Contact)

🧱 4. SITE STRUCTURE (TOP-LEVEL IA)

```
/
├── Hero
├── About
├── Selected Work (Case Studies)
├── Live Prototypes
├── AI Systems
├── Product Thinking
├── Failure & Learning
└── Contact
```

🌌 5. EXPERIENCE LAYER (ANTIGRAVITY SYSTEM)

This is NOT just visual — it's structural.

Global Behavior:

- Floating background elements (continuous motion)
- Scroll-based reveal (progressive disclosure)
- Depth hierarchy:
  - Background → blurred gradients
  - Mid-layer → content cards
  - Foreground → text & CTA

Interaction Rules:

- Hover = lift (z-axis illusion)
- Scroll = fade + slide
- Idle = slow drift

🧩 6. SCREEN-BY-SCREEN IA

🔹 HERO SECTION (Entry Point)

🎯 Goal:

Hook + Positioning + Credibility in 5 seconds

Content Blocks:

[Name]
Kaustubh Deshmukh

[Primary Headline]
“I don’t just strategy-deck — I prototype, ship, and prove ideas.”

[Subtext]
AI-native Product Manager building products that reduce drop-offs and accelerate activation.

[Metrics Row]
• 5+ Live Prototypes
• 2+ Years 0→1
• 30+ User Interviews
• 5 AI Agents Built

[CTAs]
→ View Work
→ Contact

Interaction:

- Floating UI elements around hero
- Text fade-in sequence
- Metrics animate (count-up)

🔹 ABOUT SECTION

🎯 Goal:

Establish story + operator mindset

Content:

- Background (Engineer → Founder → PM)
- Wash on Wheels learning
- Operator instinct
- Transition to AI-native PM

Structure:

- Short paragraph (not long bio)
- Highlight 1 key insight:
  → “Products live or die in real user behavior”

🔹 SELECTED WORK (CORE SECTION)

🎯 Goal:

Show proof of impact (NOT description-heavy)

Layout:

Grid (3 cards)

Card Structure:

[Title]
Netflix — Continue Watching 2.0

[Impact First]
+30% CTR
+2–4% Retention
-2 min time to play

[Problem (1 line)]
Clutter reduced engagement

[Interaction]
Hover → lift + glow
Click → expand modal

Cases:

1. Netflix
2. Zomato
3. Wash on Wheels

🔹 LIVE PROTOTYPES (DIFFERENTIATION)

🎯 Goal:

Prove “I ship, not just think”

Layout:

Grid with tags

Card:

[Project Name]
NomadAI Travel

[Tags]
AI / Travel / Personalization

[CTA]
View Prototype

Items:

- NomadAI
- Smart Cleanup
- Seed to Plate
- AI Wedding Planner

🔹 AI SYSTEMS (UNFAIR ADVANTAGE)

🎯 Goal:

Show technical depth + future readiness

Layout:

Visual pipeline (horizontal flow)

Structure:

Idea → Market Analysis → Prioritization → Roadmap → PRD Output

Second Flow:

Input → Market Data → Sentiment → Technical → Fundamentals → Output

Interaction:

- Animated arrows
- Node highlighting

🔹 PRODUCT THINKING

🎯 Goal:

Show structured thinking

Content:

- Rapido teardown
- Google Maps UX analysis

Layout:

Minimal cards

[Title]
Rapido Onboarding Teardown

[Focus]
User journey + friction points

🔹 FAILURE & LEARNING (TRUST BUILDER)

🎯 Goal:

Create authenticity (VERY powerful)

Title:

“What I got wrong”

Structure:

[Assumption]
Built for app users

[Reality]
Customers preferred calls

[Mistake]
Optimized Instagram

[Reality]
Growth came from word-of-mouth

[Learning]
Validate before building

🔹 CONTACT (FINAL CONVERSION)

🎯 Goal:

Drive action

Content:

Headline:
Let’s build something meaningful

Email
LinkedIn
Location

CTA Button

🧭 7. NAVIGATION STRUCTURE

Sticky Nav (minimal):

Work
Prototypes
AI Systems
Contact

Behavior:

- Smooth scroll
- Active section highlight

⚡ 8. CONTENT PRIORITY (VERY IMPORTANT)

Order of importance:

1. **Metrics (impact)**
2. **Work (case studies)**
3. **Prototypes (proof of shipping)**
4. **AI systems (differentiation)**
5. Story (about)
6. Failure
7. Contact

💎 9. DIFFERENTIATION LAYER

This is what makes you **top 1%**

You are NOT:

- “PM who writes PRDs”

You ARE:

- PM who:
  - Builds prototypes
  - Ships AI systems
  - Thinks in outcomes

🚀 10. SUCCESS METRICS (FOR YOUR SITE)

You should measure:

- Time on page

- Scroll depth
- Click on “View Work”
- Recruiter responses

Tab 2

This is a **strong prompt already** — but I'm going to elevate it to **top-tier PM portfolio thinking**.

Right now it's:
✅ Structured
❌ Still slightly "builder-focused"

We'll upgrade it to:
👉 **Recruiter psychology + product storytelling + visual clarity**

🧠 REFINED OUTPUT (What Antigravity SHOULD produce)

I'll give you exactly what you asked:

- IA → UI breakdown
- Component structure
- Tailwind system
- JSX samples
- Enhancements

🧱 1. SECTION-WISE UI BREAKDOWN

🔷 HERO (First 5 Seconds = Decision Moment)

🎯 Goal:

Make recruiter think:

> "This person has clarity + impact"

Structure:

[Name]

Kaustubh Deshmukh

[Tagline]
I build and ship AI-powered products that improve activation and retention.

[Subtext]
Former founder. AI-native PM. I prototype before writing PRDs.

[Metrics Row]
• 5+ Prototypes
• 2+ Years 0→1
• 30+ Interviews
• 5 AI Systems

[CTA]
→ View Work
→ Contact

UX Notes:

- Centered
- High contrast typography
- Immediate scanability

🔷 ABOUT (Signal > Story)

🎯 Goal:

Show how you think

Structure:

Short narrative (4–5 lines max)

Key strengths:
• 0→1 Product Building
• AI Prototyping
• User Research → Insight → Execution

UX Rule:

👉 No long paragraphs
👉 Skimmable blocks only

🔷 CASE STUDIES (MOST IMPORTANT SECTION)

🎯 Goal:

Prove impact fast

Layout:

Card-based grid → Expand on click

Card Structure:

[Title]
Netflix — Continue Watching 2.0

[Impact First]
+30% CTR
+2–4% Retention

[Problem]
Users overwhelmed by clutter

[Solution]
Smart cleanup with behavioral signals

Expand View:

Problem → Insight → Solution → Impact → Trade-offs

UX Insight:

👉 Metrics FIRST
👉 Story SECOND

🔷 PROJECTS (Execution Proof)

🎯 Goal:

Show you build, not just think

Structure:

[Project Name]
NomadAI Travel

[What it does]
AI-powered trip planning

[Tags]
AI / Personalization

[CTA]
View Project

🔷 SKILLS (Positioning, not listing)

🎯 Goal:

Frame your strengths strategically

Categories:

Product:
• 0→1
• Growth
• Retention

Tools:
• n8n
• Gemini
• Figma

Execution:
• User Research

• Experimentation
• Rapid Prototyping

🔷 CONTACT (Conversion Layer)

🎯 Goal:

Make reaching out frictionless

Let’s build something meaningful

Email
LinkedIn
CTA Button

🧭 2. REACT COMPONENT STRUCTURE

📁 Folder Structure

```
/components
  Navbar.jsx
  Hero.jsx
  About.jsx
  CaseStudies.jsx
  CaseCard.jsx
  Projects.jsx
  ProjectCard.jsx
  Skills.jsx
  Contact.jsx
  Container.jsx

/pages
  Home.jsx

App.jsx
```

🔁 Reusable Components

1. Card Component

- Used for case studies + projects
- Props:
  - title
  - description
  - metrics
  - tags

---

2. Section Container

- Handles spacing + max width

---

3. Button Component

- Primary / Secondary variants

🎨 3. TAILWIND STYLING SYSTEM

🎯 Colors

Background: #0B0F19
Primary Text: white
Secondary Text: gray-400
Accent: blue-500 / purple-500

🎯 Typography

Hero: text-5xl / text-6xl

Section Title: text-3xl
Body: text-base / text-lg

🎯 Spacing

Section padding: py-20 px-6
Container: max-w-6xl mx-auto
Grid gap: gap-6

🎯 Cards

bg-white/5
backdrop-blur
border border-white/10
rounded-2xl

⚡ 4. MICRO-INTERACTIONS (SUBTLE BUT IMPORTANT)

Hover Effects:

- Cards → slight lift + scale
- Buttons → smooth expand

Scroll:

- Fade + slide-in sections

Feedback:

- CTA hover glow

👉 Rule:
Subtle > flashy

💻 5. SAMPLE JSX SNIPPETS

🔹 Hero Section

```
<section className="h-screen flex flex-col justify-center items-center text-center px-6">
  <h1 className="text-5xl md:text-6xl font-bold">
    Kaustubh Deshmukh
  </h1>

  <p className="mt-4 text-gray-400 max-w-xl">
    I build and ship AI-powered products that improve activation and retention.
  </p>

  <div className="mt-6 flex gap-4">
    <button className="px-6 py-3 bg-white text-black rounded-full">
      View Work
    </button>
    <button className="px-6 py-3 border border-gray-600 rounded-full">
      Contact
    </button>
  </div>
</section>
```

🔹 Case Study Card

```
<div className="p-6 rounded-2xl bg-white/5 border border-white/10 hover:scale-105
transition">
  <h3 className="text-xl font-semibold">
    Netflix — Continue Watching 2.0
  </h3>

  <p className="text-sm text-gray-400 mt-2">
    +30% CTR · +2–4% Retention
  </p>

  <p className="mt-3 text-gray-300">
    Reduced clutter using behavioral signals and smart decay logic.
```

</p>

🚀 6. OPTIONAL ENHANCEMENTS (HIGH IMPACT)

🔥 Level 1 (Must-have)

- Sticky navbar
- Smooth scroll
- Section reveal animations

🔥 Level 2 (Differentiation)

- Expandable case studies
- Metrics animation (count-up)

🔥 Level 3 (Elite)

- Cursor interaction
- Scroll progress indicator
- Prototype embeds

Tab 3

🧠 1. CORE DESIGN PHILOSOPHY

- **Clarity drives layout**
- **Depth enhances focus (not decoration)**
- **Glass used selectively, not everywhere**
- **Metrics > visuals > copy**

👉 Think:

> "Minimal system with premium highlights"

🎨 2. COLOR SYSTEM

Base (from Option 1)

- Background: `#0B0F19`
- Surface: `#111827`
- Text Primary: `#FFFFFF`
- Text Secondary: `#9CA3AF`

Accent (from Option 2)

- Primary Accent: `#3B82F6` (blue)
- Secondary Accent: `#8B5CF6` (purple)

Gradient Usage (controlled)

- Only for:
    - Hero glow
    - Hover states
    - Highlights

👉 Principle:
90% neutral + 10% accent

✍️ 3. TYPOGRAPHY SYSTEM

- Font: Inter / Satoshi
- Hero: `text-5xl → text-6xl font-bold`
- Section Title: `text-3xl font-semibold`
- Body: `text-base text-gray-400`

Key Rule:

👉 No decorative fonts
👉 Strong hierarchy = premium feel

🧱 4. COMPONENT SYSTEM

🔹 A. Cards (Hybrid Style)

Base:

bg-white/5

border border-white/10
rounded-2xl

Premium Layer (on hover only):

hover:bg-white/10
hover:shadow-[0_0_30px_rgba(139,92,246,0.15)]
hover:scale-[1.02]

👉 Insight:
Glass effect appears **only on interaction** → feels alive

🔹 B. Buttons

Primary:

bg-white text-black rounded-full px-6 py-3
hover:scale-105

Secondary:

border border-white/20 rounded-full px-6 py-3
hover:bg-white hover:text-black

🔹 C. Sections

py-24 px-6 max-w-6xl mx-auto

👉 Spacious layout = premium perception

🌌 5. ANTIGRAVITY SYSTEM (CONTROLLED)

Background Layer:

- 2–3 blurred gradient orbs
- Slow drift animation

Foreground:

- Static content (clarity)

Interaction Layer:

- Hover = lift + glow

👉 Rule:
Motion supports focus, not distracts

🧩 6. PAGE STRUCTURE (FINAL UX FLOW)

HERO

- Minimal + centered
- Subtle gradient glow behind text
- Floating elements (low opacity)

CASE STUDIES (CORE)

- Clean cards (Option 1)

- Hover glow (Option 2)
- Metrics FIRST

PROTOTYPES

- Slightly more visual
- Tags + interaction

AI SYSTEMS

- Light glass + connectors
- Feels “technical but clean”

ABOUT + SKILLS

- Mostly flat (no heavy effects)

CONTACT

- Clean + bold CTA

⚡ 7. MICRO-INTERACTION SYSTEM

Element	Behavior
Cards	Lift + glow
Buttons	Scale + contrast
Sections	Fade + slide
Background	Slow drift

👉 One system. No randomness.

💎 8. WHERE TO USE GLASS (IMPORTANT)

Use glass ONLY in:

✅ Project cards
✅ Prototype cards
✅ AI systems

Avoid in:

❌ Text-heavy sections
❌ About
❌ Hero body text

🧠 9. WHY THIS COMBO WORKS

Option 1 gives:

- Speed
- Clarity

- Recruiter conversion

Option 2 gives:

- Identity
- Depth
- Memorability

Together:

👉 You get:

> “This person is sharp AND has taste”

🔥 FINAL DESIGN IDENTITY

If someone describes your portfolio, it should sound like:

> “Super clean, very sharp, but with subtle depth and motion — feels like a product person who understands both UX and systems.

Tab 4

Good — now we move from **“solid portfolio”** → **“top 1% premium experience.”**

This is not about adding more.
It’s about **refinement, motion, and perception.**

🧠 PREMIUM UPGRADE STRATEGY

We’ll upgrade your existing system across 4 layers:

1. **Visual depth (antigravity + glass)**
2. **Typography + spacing (luxury feel)**
3. **Interaction system (micro-delight)**
4. **Content framing (PM signal boost)**

🎨 1. VISUAL SYSTEM (PREMIUM LOOK)

🔷 Background System

Add depth using **layered gradients + blur**

Background: #0B0F19
Overlay: radial gradient (blue/purple glow)
Noise: very subtle grain (optional)

👉 Effect:
Feels like **Vercel / Linear / Apple-level polish**

🔷 Floating Antigravity Elements

- 2–3 blurred orbs
- Very slow drift (10–20s loop)
- Low opacity (10–20%)

👉 Rule:
Background should feel alive, not distracting

✍️ 2. TYPOGRAPHY UPGRADE

🔥 Before (basic)

- Same font everywhere
- Flat hierarchy

🚀 After (premium)

Hero:

- Large, bold, tight spacing

Example:
text-6xl md:text-7xl font-semibold tracking-tight

-

Body:

Softer tone:
text-gray-400 leading-relaxed

-

Section Titles:

text-3xl font-semibold tracking-tight

👉 Premium signal:
Less text, better spacing

🧱 3. COMPONENT UPGRADE

🔹 Cards (CRITICAL CHANGE)

Before:

Flat card

After:

Layered + reactive

bg-white/5 backdrop-blur-xl
border border-white/10
rounded-2xl
transition-all duration-300

hover:
- scale-[1.03]
- bg-white/10
- shadow-[0_0_40px_rgba(59,130,246,0.15)]

👉 Insight:
Card should feel like it's **lifting toward the user**

🔹 Buttons

Premium Behavior:

- Slight scale
- Glow on hover

bg-white text-black rounded-full px-6 py-3
hover:scale-105
hover:shadow-lg
transition-all

🌌 4. MOTION SYSTEM (THIS MAKES IT ELITE)

🔷 Entry Animation

Every section:

- Fade in + slide up

👉 Timing:

- 0.6s
- slight delay stagger

🔷 Hover System

Element	Behavior
Cards	Lift + glow
Buttons	Expand
Tags	Soft highlight

🔷 Scroll Feel

- Smooth
- No jumps
- Sections reveal progressively

🧩 5. HERO — PREMIUM VERSION

🔥 Upgrade Layout

[Headline — BIG + BOLD]
I build and ship AI-powered products.

[Subtext — soft]
From 0→1 startups to AI systems that improve activation.

[Metrics — inline]
5+ Prototypes · 30+ Interviews · 5 AI Systems

[CTA — clean]
View Work / Contact

✨ Add:

- Subtle gradient glow behind text
- Floating UI shapes around hero

👉 This creates:
Immediate authority + visual polish

🧠 6. CASE STUDIES — PREMIUM FRAME

🔥 Key Change:

Impact FIRST (visually dominant)

Layout:

[Metric — BIG]
+30% CTR

[Title]
Netflix Continue Watching 2.0

[1-line insight]
Reduced clutter using behavioral signals

👉 Recruiter scans:
→ Metric
→ Title
→ Done

🧩 7. ADD THIS (DIFFERENTIATOR)

🔷 “AI SYSTEMS” SECTION

Most PMs don’t have this.

You do.

Show like:

Idea → Analysis → Prioritization → PRD → Output

👉 Visual flow = **credibility boost**

⚡ 8. MICRO-DETAILS (THE REAL PREMIUM)

Add:

- Cursor feels smooth (no lag)

- Consistent spacing rhythm (8px grid)
- Rounded corners everywhere (2xl)
- No harsh edges

Remove:

❌ Heavy gradients everywhere
❌ Too many colors
❌ Long paragraphs

📱 9. RESPONSIVENESS (PREMIUM RULE)

Mobile should feel:

👉 Not “compressed desktop”
👉 But “intentionally designed”

- Stack sections cleanly
- Increase spacing
- Keep tap targets large

🧠 FINAL TRANSFORMATION

BEFORE:

“Good PM portfolio”

AFTER:

“This feels like someone who can lead product at a top company”
